DETAILED ACTION

Election/Restrictions

1. Claim 1 is allowable. The restriction requirement between the Species of Figs. 1-14, as set forth in the Office action mailed on 5/3/2006, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.**

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim(s) presented in a continuation or divisional application includes all the limitations of a claim that is allowable in the present application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter: Claims 1-8, 9-16, 18-22 and 24-25 are considered allowable over the prior art of record since prior art of record fails to show or fairly suggest a noise reduction device having a first antenna which receives a wireless signal; a second antenna for noise scanning; setting means for setting an optimum attenuation factor according to a distance between the first antenna and the second

antenna; attenuation means for attenuating a received signal from the second antenna at the optimum attenuation factor; and subtraction means for subtracting an output signal of the attenuation means from the received signal from the first antenna, and for thereby reducing a noise of the received signal from the first antenna as substantially described and connected in independent claim 1.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Following references are related to the present claimed invention:
